For the attention Mr António Guterres, Secretary-General of the United Nations.

Subject: Request for assistance to produce a film

Hello,

I would like to be able to present a science fiction film project to the United Nations that deals with the entire world's nuclear arsenal.

This film will have resonance for the entire world population to be broadcast in cinemas around the world.

This will help open consciousness to the global dangers that are present as a result of nuclear weapons.

I would like to send a copy the script of my cinematographic project to the United Nations in order to pursue, I hope, its feasibility.

Allow me to give you a little glimpse, of what could become a very big cinema project, and which bears title Andromeda.

The scenario for the film Andromeda

The film project is mainly based on a hypothetical theory, entirely imaginary, that could have caused the disappearance brutal dinosaurs,

According to this imaginary hypothetical theory for the film Andromeda, thermonuclear missiles were accidentally sent by an alien civilization from the neighboring Andromeda galaxy, and these landed on Earth 70 million years ago.

The role of the scientist/Professor will be played by an African-American actor, and long scenes will be played in the Great Hall of the United Nations General Assembly at the beginning and end of the film.

Allow me also to present my request for an audience with Mr António Guterres, Secretary-General of the United Nations, to allow him to get a closer look at the whole project (Andromeda) for cinemas around the world.

I look forward to hearing from you.

Please accept, Mr. Secretary-General of the United Nations, my best regards.

Mr Belkhir SAYAH

Ps : let me inform you that I do not speak English I only speak French.
